Kick

Managed DMARC/DKIM Service

In today's digital landscape, email security is not just an option - it's a necessity.

With the increasing sophistication of cyber threats, safeguarding your email communications is critical.

Our Managed DMARC/DKIM Service is designed to enhance your email security, ensuring that your emails are authenticated, delivering directly to inboxes, and protecting your domain from being hijacked for spoofing and phishing attacks.

Features and benefits

/ Beyond Certification: Offers a full package from discovery to certification, not just the end goal.

/ Custom Assessments: Identifies specific vulnerabilities for targeted improvements.

/ Remediation Guidance: Provides clear plans for addressing gaps before certification.

/ Submission Support: Assists with the application process for a smoother journey.

/ Enhanced Security: Ensures a stronger defence than certification alone implies.

Service offerings

/ Initial Setup and Configuration: We take care of the entire setup process, from verifying your domain to configuring your DMARC and DKIM policies for optimal security.

/ Monitoring and Management: Our team continuously monitors your email traffic and DMARC reports, ensuring that your email authentication standards are always met.

/ Reporting and Analysis: Receive regular reports with actionable insights, allowing you to make informed decisions about your email security policies.

/ Technical Support: Access our team of email security experts for support and consultation, ensuring your DMARC and DKIM settings are always optimised.

Why choose Kick ICT?

With a focus on customer satisfaction, advanced security technologies, and a team of dedicated experts, our Managed DMARC/DKIM Service stands out as the leading choice for businesses looking to secure their email communications.

Don't let your email security be an afterthought. Contact us today to learn more about our Managed DMARC/DKIM Service and take the first step towards securing your email communications.
